

# Sample game plan for experimenting to score a four-way win

Write a 1-sentence description of your experiment.

- How achieve better performance? Describe how you hope and expect performance will improve in all four domains as a result of your experiment.
- Assistance / advice needed? Describe the assistance and advice you expect you'll need as you take the next steps on implementing your experiment.
- Obstacles? Describe the main obstacles you anticipate running into and how you intend to deal with them.
- Is it really innovative? Describe how this experiment is innovative for you. What's new about it?

# Sample scorecard: Your name and type of experiment(s) here

	Goals: Intended Impact	Results: Measuring Success	Action Steps
Work	<ul style="list-style-type: none"><li>Record goals for work here</li></ul>	<ul style="list-style-type: none"><li>Record how you will measure success in meeting these goal s here.</li></ul>	<ul style="list-style-type: none"><li>Record the specific steps you will take to implement your experiment here.</li></ul>
Home	<ul style="list-style-type: none"><li>Record goals for home here</li></ul>	<ul style="list-style-type: none"><li>Record how you will measure success in meeting these goals here.</li></ul>	
Community	<ul style="list-style-type: none"><li>Record goals for community here</li></ul>	<ul style="list-style-type: none"><li>Record how you will measure success in meeting these goals here.</li></ul>	
Self	<ul style="list-style-type: none"><li>Record goals for self here</li></ul>	<ul style="list-style-type: none"><li>Record how you will measure success in meeting these goal here.</li></ul>	

## Results of your experiment

After implementing your experiment, write about its impact by answering these three questions:

What actually happened?

What were the results, in each domain?

What did you learn from this experiment?
